# YOTI

Identity-driven eSigning

Know exactly who's signing your documents with verified eSignatures linked to a digital identity.

SENDER

Get documents Signed in four steps

1. Upload your documents.

2. Add your recipients and turn on Yoti app verification.

3. Add drag-and-drop fields.

4. Review and send.

No code portal OR **Integrated API** API

- Reminders and email notifications
- Supplementary documents
- Bulk send
- Drag-and-drop fields
- Full audit trail and document history
- eWitnessing
- Signing order
- Multi-device signing
- Identity verification
- Dedicated support

SIGNER

Identity verification at the point of signing

When adding recipients to sign your document, simply turn on Yoti authentication and select the identity details you need.

Signers will be asked to scan a QR code in the email with their Yoti app and share pre-verified identity details from their digital ID.

More on Yoti Digital ID >

Secure

We meet some of the world's most **stringent security standards** and protect documents with **high-level encryption.**

Compliant

Our eSignatures are compliant with **eIDAS**, the **ESIGN Act** and the **UETA Act.**

Lawful
